# What's new?

Discover the latest updates bringing you, smart tips, and powerful features. Explore innovations and developments designed to support your daily work and boost efficiency.
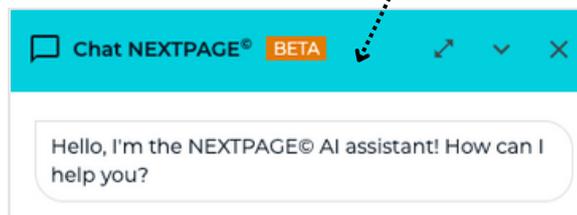

NEXTPAGE©

New dashboard   demo link :

This new feature offers greater flexibility and improved data visibility.
You can now configure your dashboard according to your needs:
 ▪ Choice of widgets to display (products, references, completeness, flows, etc.).
 ▪ Move widgets to highlight priority information.
 ▪ Remove widgets that are not useful.

New Chatbot assistant

AI assistant can answer questions, provide explanations about features, or help you in your daily use of the solution.
It's a French BETA version that will be available in English in the following months.

New Tips - MDU FILTERS   demo link :

Do you need a faster way to find the right product?
Our new shared filtering feature makes this process easier than ever. It only applies to references sold by the relevant MDUs, ensuring precise results. You can now focus on the most relevant references for your market.
This saves time, reduces errors, and improves overall efficiency.
Please note, however, that new products that have not yet been sold will only appear once orders have been recorded in the ERP system.
